Very old Hidden object game with just the basics, a bunch of HO scenes without any story tying them together. and a few minigames such as match-3 and memory in between levels. In today's market there's a lot of better HO games out there so give this one a pass.. I bought this game while it costed \$4.99. I don't really recommend it at its current stage because I did refund this and the reason why was because I was able to play through the whole game in just 28 minutes. It's fun but it's very short and I don't see that much replayability.. what the hell just happened. questo prodotto al momento è ottimo per elaborare mappe ma al contrario di quanto sembra dai video non permette la creazione di veri e propri giochi in maniera autonoma...

di fatti sono assenti le seguenti opzioni:

- interazione degli npc o costruzione di un npc (like in game shop or quest sistem...)
- sistema per droppare roba dalle kill o dalle chest o dalle risorse (like kill mob and open chest drop items...)
- impossibile capire quanta vita abbia il personaggio o i mob disponibili, impossibile creare skill o personalizzare un eroe, ne tanto meno organizzare un sistema a livelli (player level upgrade, player skill like magick or combat upgrade whit new spell or ne combat style)
- creare un sistema bilanciato tra attacco e difesa (rpg-fps)
- non dispone di un manuale valido che spieghi in maniera valida il software e le varie opzioni tantomeno i dlc
- costa troppo per poterci costruire solo le mappe
- non dispone di un sistema per rendere le mappe parte di un gioco
- non ha la possibilità di creare giochi mmo
- da l'idea di creare un gioco facendo fruttare le dlc, ma in realtà si tratta esclusivamente di mappe personalizzate.
- si può utilizzare per creare mappe da esportare ma comunque il costo non ne sarebbe la pena. Bird game best game IGN:10/10 BASICALLY the dark souls of video games.. Completely rng based around the corruption bosses but pretty good none the less.. You get what you paid for, 5K achievements at minimum price. If you're an achievement hunter looking to increase the number of achievements on your profile showcase, then I highly recommend buying this. Else don't waste your money. This is not a game, it's just a way of distributing achievements.

Protect your zeppelin, upgrade or replace your on-board weapons and shoot down as many planes as you can before time runs out or before they destroy your cargo. It's a form of tower defense, but very basic and easy. After each level you have the opportunity to add new weapons or replace existing ones with unlocked or upgraded guns. The graphics look poor and there's practically no sound (the thunder and guns are the only sounds that come to mind actually). I wouldn't really recommend it to anyone.

[Rating: 65/100]. The puzzle room VR is a very simple yet puzzling game. It puts you in a room where you are trapped yet you have freedom to interact with almost every single aspect of that room. The game at its current state is not too hard, but if you are one to mess around in VR you can easily waste time in this game and still have fun. Currently it only has 2 rooms to escape from. The first room being short and easy yet still fun. While the second room feels like the developers put more time into it to make it a little longer. Both rooms are still fun and possible to complete. If you are looking for an escape the room for a decent price and future updates the price on this game is pretty reasonable. I'd recommend this game to anyone looking to escape a room or two, and definitely recommend throwing some friends into the game as well.. I played it for a little bit and thought it was rather good. soon realised how boring this game actually is. if you want a racing game go for Forza or Grand Turismo as their better designed games and less repetitive racing. Worth the price for the Maserati 250Fs alone- Perfect for playing out Fangio throttle steering fantasies at Monza.

Italians make the greatest cars, and greatest car simulations evidently!. In this game are three different rooms, each with a different theme, and you need to complete a series of tasks to find the key for each room and escape. Room 2 and 3 are enjoyable, the design in these rooms are good, the puzzles are of a medium difficulty and Room 2 was the most enjoyable because there was interactivity with many of the items in the room, an additional mini shooter game to play, and the room is the most detailed of the three in its design. However, music was again absent in this room and also room 3. The game could do with a series of improvements to be up to par when compared with other VR escape the room type games. Although the puzzles are of a reasonable medium difficulty, the design is lacking and feels unfinished. The game is also overpriced for what it offers, the room designs should be more detailed, music should be available, more rooms should be added. I don't recommend this game simply because there are many other VR escape the room games that offer better value for money. Overall, the game feels overpriced and unfinished. Additionally, there also seems to be a problem with the physics. In Room 2 I flew out of the window and had to restart, and in Room 3 my mouse got lost in the wall and I had to restart that room as that was the only option available (both of these moments have been left in my let's plays so that viewers can see this problem). That therefore impacted the enjoyability of the gameplay as this problem results in less immersion.
